

Practice Plus Group, Ophthalmology

Bamber Bridge

Following a number of years successfully delivering Macular services via our mobile services, we are thrilled to announce our new permanent eye care facility has opened in the heart of Bamber Bridge, just three miles from Preston.

Run by a skilled ophthalmology team, the Practice Plus Group Ophthalmology treatment centre, will replace its former mobile eye unit situated in B&Q car park, Craven Drive, Preston, which has served the local community and surrounding areas for seven years – freeing up the mobile unit to cover a broader area and give greater access to eye treatments to people in neighbouring communities.

The new high-specification clinic at Bamber Bridge incorporates a welcoming reception area, waiting room, assessment suites and treatment rooms in which patients receive the sight-stabilising injections required for AMD treatment.

Caroline McHugh Service Director for Ophthalmology, says: "We aim to offer patients the very best in ophthalmic care and we continue to deliver excellent outcomes. Our new permanent treatment centre will be a central hub for people of Bamber Bridge and surrounding areas and brings with it a skilled team of eye-specialists and boasts lower waiting times and a one stop diagnosis and treatment approach".

Practice Plus Group Ophthalmology, Unit 10, Cotton Mill Road, Bamber Bridge, Preston, PR5 6LF
